## JUNIOR POST-DOC POSITION

Mass Spectrometry Laboratory, Institute of Biochemistry and Biophysics, Pol. Acad. Sci., located in Warsaw, Poland, invites applications of candidates for Junior Postdoc position, wishing to work in the National Science Centre (NCN) MAESTRO project: „**Approach to structures of difficult protein targets using new mass spectrometry-based methods**” (leader - prof. Michał Dadlez), which will be carried out in collaboration with our French, UK, USA & German partners. The project focus is the application of MS-based techniques for an in-depth analysis of selected protein assemblies, including their structural analysis (IonMobilitySeparation-MS, ETD monitored HDexchange, etc. – see project details at <http://mslab-ibb.pl/maestro>).

We offer two full-time post-doc positions for highly motivated persons holding Ph.D. degree in biophysics, biochemistry, biology, biotechnology or alike.

More information on the project and the recruitment policy can be found on the website: <http://mslab-ibb.pl/en/maestro-2>

Please send your complete application (cover letter, CV, list of publications, reference letters) via email to: [msteam@ibb.waw.pl](mailto:msteam@ibb.waw.pl) before May 22<sup>nd</sup>, 2015.
