

MakeLearn International Scientific Conference on Management of Knowledge and Learning is organised by the International School for Social and Business Studies (ISSBS) in cooperation with foreign partner universities, international institutes and organisations. The conference takes place usually in May in a different country. Through MakeLearn, the ISSBS encourages the sharing of most recent developments in the field of knowledge management. By including individuals from major regional businesses, MakeLearn also encourages discussion and the exchange of knowledge between the academia and the economy. Although the general theme of the conference, i.e. management of knowledge and learning in businesses and other organisations, remains the same, each year the focus of the conference is adapted to regional and global findings, occurrences and needs of the time.

TIIM Technology, Innovation and Industrial Management International Conference promotes the exchanges, discussion, and dialogues on how to manage industrial operations and organizations in more innovative, effective, and productive manners. The sustainable development and continuous improvement as a result of technological applications and organizational innovation are focal point of the conference.
