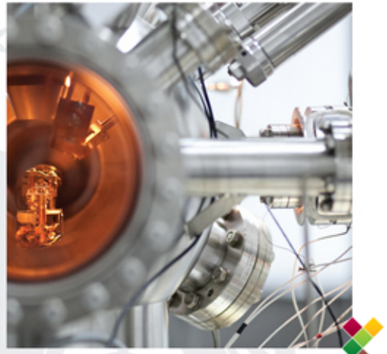
RESEARCH & DEVELOPMENT

Research, along with education, constitutes the most important sphere of university activity. UMCS conducts research at eleven Faculties and at the University's interdisciplinary centers. These investigations bring numerous remarkable achievements and are the foundation for scholarly development of the academic staff. The range of research subjects is extremely wide: scholars conduct work on groundbreaking inventions in life and health sciences, develop new diagnostic and treatment methods, construct innovative materials or equipment, analyze physicochemical, economic, social and cultural processes in the world, and conduct thorough observations of the environment and climatic changes, and field studies.



THE CAMPUS

The UMCS campus is a complex of buildings situated in the immediate vicinity of the University's teaching buildings. It encompasses the UMCS dormitories, private dormitories offering rooms for students, and the UMCS Academic Sports Centre, which consists of three sports halls, an indoor swimming pool, two bodybuilding gyms, an aerobics room and a remedial gymnastics room. The centre also has a new multifunctional field with artificial turf and lighting, two beach volleyball courts, as well as two tennis courts.

There are also a number of pubs, discos, eating places, shops, and copy&print shops on the campus. The university-owned Academic Park is located in the south part of the campus.

WHY LUBLIN?

Lublin is a dynamically developing city, a place for young and active people.

Firstly,

Lublin is a city with a 700-year history. Lublin's historical heritage and the intermingling of nations, cultures and religion have created a magical climate, the best for studying and personal growth. All these elements constitute a source of inspiration for miscellaneous cultural, artistic, and scientific endeavours.

Secondly,

Lublin is the largest city in Eastern Poland, with the population over 340.000 inhabitants making it one of Poland's ten largest cities. It is also the most prominent **centre of cultural life in Eastern Poland**, with many important national and international concerts and festivals organized every year.

Thirdly,

Lublin is well known for its great **academic traditions**. The city provides a pleasant atmosphere for studying, with 80.000 students receiving their education here.

Last but not least, Lublin is easily accessible.

The city has an airport, as well as modern and ever-improving road infrastructure. At the same time Lublin is a comparatively affordable place to live, offering numerous flats to let, accommodation at University campuses, as well as multiple recreational venues.

Lublin is a dynamic and continuously developing city. Thanks to its growing international cooperation, developing infrastructure, urban planning and strong support for various business initiatives and investments Lublin is the perfect place not only for studying, but also for starting your business or scientific career. The city is known for successful innovative ideas and international project implementation. It provides excellent conditions for scientific researches and technology development, such as Lublin Science and Technology Park, Ecotech-Complex.
