

Laudea Research

INTELLECTUAL PROPERTY ANALYST IN CHEMISTRY

Location: remote within EU
Working language: English
Employment type: Full-time

ABOUT LAUDEA RESEARCH GMBH

Laudea Research is a young and growing company with headquarters in Germany, supporting European patent law firms and corporate clients in making strategic decisions and evaluations in the field of Intellectual Property (IP). We specialize in IP research in the fields of chemistry, biotechnology and life sciences.

YOUR PROFILE

You hold a Master's degree or PhD in the field of chemistry (organic chemistry, polymer chemistry, medicinal chemistry).

You have knowledge of chemical structure drawing methodologies.

You are fluent in English, written and spoken. Fluency in German is desired.

You will work on projects as short as one day or lasting few weeks. Time management skills will be crucial to successful and timely execution of these projects.

Patents can - and often are - complex and intentionally obfuscated. You must possess strong analytical skills to understand and interpret them.

WHAT A TYPICAL DAY AS AN IP ANALYST WILL LOOK LIKE

You will start with analysing the invention that is the subject of the project. The project might be about a ground-breaking invention in cancer treatment, plastics used to produce bottle caps or a recipe for perfect fries. Based on your understanding of the project and expertise in the subject field you will develop a search strategy. Using various search platforms, you will then proceed to execute the strategy. At this point, your ability to adapt and think critically will kick in.

You will adjust and re-evaluate your search strategy constantly to deliver the most accurate research. At the end of the project you will collate your findings into a clear and concise report as per customer needs.

Throughout the whole process you will have the support of Laudea's experience and resources. At the beginning of the employment you will undergo an intensive training covering subjects including patent law, search methodologies, use of search platforms and other necessary skills.

WORKING REMOTELY

You are free to work remotely from wherever you choose. We just ask that you are available during Central Europe time zone business hours in sustainable manner.

We look for smart individuals with drive and high work ethics. We do so because we trust that you will deliver irrespectively of your location or working hours. We value transparency. We trust our people.

In this remote environment you will have our full support. Equipped with software and hardware, with access to seamless video conferencing you will be able to reach your colleagues without a hassle. The only thing you need is a high speed and reliable Internet connection.

Performing IP research and analysis is a challenging job, and doing it remotely requires a special type of person and passion. If this unique challenge appeals to you, we'd love to talk to you!

Within the European Union we are able to offer a full-time employment contract.

DIVERSITY & INCLUSION

Laudea Research is an equal opportunity employer and are committed to building a company that embraces and celebrates diversity and inclusion. We do not discriminate on the basis of race, religion, colour, national origin, gender, gender identity or expression, sexual orientation, age, marital or disability status.
