We are pleased to invite you to the scientific conference combined with workshops from the series

BioInformatics in Toruń

BIT19 - MACHINE LEARNING and COMPUTATIONAL INTELLIGENCE IN BIOINFORMATICS

which will be held on **27-29 June** (Thursday-Saturday) 2019 at the Institute of Physics of the Nicolaus Copernicus University in Toruń (Poland).

The aim of this intimate conference, organized by the Polish Bioinformatics Society and Faculty of Physics, Astronomy and Informatics UMK, is to familiarize the Polish scientific community with the progress in the applications of machine learning and artificial inteligence in analysis of huge data sets which result from the work of bioinformaticians and geneticists.

Twenty lectures and workshops trainings are scheduled, offering an insight into a wide range of issues including bioinformatics and machine learning in computational biology. We welcome proposals for oral and poster presentations. Especially, we invite PhD students in informatics and medicine.

Lecturers (among others):

Professor Frédéric Cazals (Inria Sophia Antipolis, France)
Professor Chris T.A Evelo (Maastricht University, Netherlands)
Professor Krzysztof Kuczera (Kansas University, USA)
Professor Lukasz Kurgan (Virginia Commonwealth University, USA)
Professor Jarek Meller (Cincinnati Children's Hospital, USA)
Professor Uwe Ohler (Max-Delbrück-Centrum für Molekulare Medizin, Germany)
Professor Michael Wagner (Cincinnati Children's Research Foundation, USA)
Professor Maciej Wiznerowicz (Poznan University of Medical Sciences, Poland)

Submission deadline: 27/05/2018.
Registration to 12/06/2018 (bit.edu.pl)

Do not miss the opportunity to make valuable scientific contacts!
