Description	<p>The module covers the knowledge in the area of international economics. The main objective of the course is to deliver deep knowledge to students about economic developments in the region of Asia and factors influencing it.</p> <p>As one of the most dynamic regions in the world, Asia is considered to be an engine of growth for the world economy. During classes, we will try to assess this statement: is the 21<sup>st</sup> Century the century of Asia? The use of economic analysis based on credible statistical data will deliver arguments in favor and against the main question.</p>
