

We have a great pleasure to invite you to the International Conference devoted to problems of professionalization of the profession of mediator. These problems are important as a research area of the current European theory and practice of mediation.

As we assume, there are also research possibilities for cooperation of our universities (in Lublin, Lutsk and Odessa) and their law faculties. We are deeply convinced that cooperation links and research proposals in this area will be an important effect of the conference.

The list of participants and programme of the conference are attached. Faculty of Law and Administration Maria Curie-Skłodowska University is organizing the conference, which will take place online on the MS Teams web platform.

**All active conference participants will be added to MS Teams based on email addresses. A link will be sent to you before the conference to enable you to connect online.**

**Information for passive participants:**

1. Information for non-registered persons in the MS Teams platform.

Send email addresses by 17 May 2021:
