Deadline for manuscript
submissions:

30 June 2022

Message from the Guest Editors

Following a very successful first run, we are pleased to announce the launch of a second edition of a Special Issue on the “Fungal Metabolism—Enzymes and Bioactive Compounds”.

In recent years, the rapid development of different biotechnological areas has had a tremendous impact on our society. So-called “microbial cell factories” were already in use thousands of years ago for alcoholic fermentation or as a source of antibiotics without knowing their real nature and composition. At present, we better understand how to use whole microbial cells, how to isolate bioactive compounds, including enzymes, or even how to manipulate their genes to improve efficiency. The proposed Special Issue embraces all fungal products with importance in the field of biotechnology and shall highlight possible areas of future development. At the same time, any research or review paper contributing significantly to a better understanding of fungal metabolism, especially by “-omics” techniques, is highly welcome.

We look forward to receiving your contribution to give greater value to the present project.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and many other databases.

Journal Rank: [JCR](#) - Q2 (*Biochemistry & Molecular Biology*)
