submissions:

30 November 2022

Message from the Guest Editor

The concept of wellbeing encompasses a comprehensive approach to people and satisfying their various needs, including a sense of safety, self-realization, ability to cope with stress, development of mental resilience, and sense of happiness and satisfaction with life. Our wellbeing also depends on the environment where we live, work, and rest. Understanding the impact of external factors is particularly important in the context of contemporary changes in the environment. This Special Issue will be primarily dedicated to the results of research on sustainable development, planning, and management of spaces. This Special Issue welcomes papers focusing on topics including (but not limited to) the following: the space of everyday life (urban and rural, including public space and green areas, regeneration and renewal); the space of leisure and recreation (assets and challenges in the development of space for tourism, including space in health resorts, sustainable tourism, agritourism); spaces of high natural and cultural value (conservation threats and challenges); evaluation and valuation of space (ecosystem services); and assessment of the quality of space (state and threats).

International Journal of *Environmental Research and Public Health*

an Open Access Journal by MDPI

Editor-in-Chief

Department of Biology, College of Science, Engineering and Technology, Jackson State University, 1400 Lynch Street, Box 18750, Jackson, MS 39217, USA

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and many other databases.

Journal Rank: JCR - Q1 (*Public, Environmental & Occupational Health*) / CiteScore - Q2 (*Public Health, Environmental and Occupational Health*)
