

KONWERSATORIUM INSTYTUTU FIZYKI UMCS

15.12.2022 r., (czwartek) godz. 11¹⁵, Aula IF im. St. Ziemeckiego

Profesor Luis Robledo

Universidad Autonoma de Madrid

Microscopic description of fission: where do we stand?

Starting from a gentle introduction to fission, I will discuss how the subject is treated nowadays from a microscopic perspective, focusing on unsolved problems like the wild dependence of lifetimes on the amount of pairing correlations in the system. Recent developments in other aspects of fission dynamics will also be discussed.

Uprzejmie zapraszam wszystkich pracowników, doktorantów i studentów Instytutu Fizyki.

Dr hab. Ryszard Zdyb, prof. UMCS
Dyrektor IF UMCS
